Acupuncture For Pain If you're anything like me and someone suggests that you try something that you're not too familiar with, you like to do a bit of research before you make any decisions on whether or not to 'give it a go'. I get that. So I have put together this overview of a broad range of health issues that acupuncture is commonly used for and a bit about how it works to achieve the results that it has for so many. In this book you will learn about:

- How Acupuncture Can Help You Manage Pain** - The powerful effect of endorphins on any pain. Qi, yin and yang, acupoints, acupuncture meridians and much more
- Acupuncture Effectiveness** - Clinical proof of the effectiveness of acupuncture treatment in pain reduction
- Acupuncture For Back Pain** - Pain control for back problems. The importance of local and distal acupoints for back pain relief. Other treatments used in conjunction with acupuncture (eg: cupping),...what they are and how they help
- Acupuncture For Headaches** - Avoiding the nasty side effects of pain management medications. Soothing your headache naturally. And finding the root cause of your pain for prevention
- Acupuncture To Help Digestive Trouble** - How improving digestion, nutritional absorption and metabolic rate can help you feel better AND assist with weight loss
- Acupuncture For Insomnia** - Calming the nervous system without the side effects of, or dependency on, medication
- Acupuncture To Treat Eye, Ear, Nose Throat Issues** - 'Flushing out' infections. Improving your immune system and balancing yin and yang for prevention
- Acupuncture For Allergies** - Alleviating the symptoms, strengthening your body and preventing future problems
- Acupuncture For Nausea** - Neutralizing stomach acids and preventing vomiting. (Often used effectively for chemotherapy patients and pregnant women)
- Acupuncture For Diabetes** - The use of acupoints and Chinese herbs to lower blood sugar levels, relieve symptoms and reduce cholesterol and other medical complications of diabetes
- Acupuncture For Sports Injuries** - Stimulating the body's natural pain relieving agents and reducing recovery time
- Acupuncture Can Help You Lose Weight** - Curbing appetite, combating cravings, boosting metabolism and much more
- Acupuncture For Inflammation** - Removing blockages and improving blood flow and circulation
- Acupuncture For Depression** - Alleviating symptoms and helping to correct chemical imbalances
- Acupuncture Helps With Addiction** - Easing mental and emotional symptoms while reducing the physical symptoms of withdrawal
- Acupuncture Is An Effective Alternative** - How over 2500 years of effective pain relief and faster healing reflects the most researched and developed medical practice available
